5. BELT AND PISTOL
Base: Brown Black AK3025
Light: Base + Gun Black AK3034
Shadow: Pure Black AK3034

6. FLESH
Gel Flesh and Skin AK3010

TRICKS:
1. When you paint boots or shoes that are in the field, start with a base base but add brown shades and light with earthy colors as the result will be dirt and mud. This will help to integrate the figure in the scene. Dirty and sandy. This will help to integrate the figure in the scene.

2. When using the Gun Black, use the color base with the lightest color of the scene, so to create different and better tones. Remember if you work with the Gun Black, use the Gun Black as a base, so you can create different and better tones.

3. When using the Gun Black, use the color base with the lightest color of the scene, so to create different and better tones. Remember if you work with the Gun Black, use the Gun Black as a base, so you can create different and better tones.

4. When you paint boots or shoes that are in the field, start with a base base but add brown shades and light with earthy colors as the result will be dirt and mud. This will help to integrate the figure in the scene.

5. When you paint boots or shoes that are in the field, start with a base base but add brown shades and light with earthy colors as the result will be dirt and mud. This will help to integrate the figure in the scene.

6. When you paint boots or shoes that are in the field, start with a base base but add brown shades and light with earthy colors as the result will be dirt and mud. This will help to integrate the figure in the scene.
