

AK 083 TRACK WASH

The perfect colour to apply on tank tracks, however it can be used to do any type of rusting metal effects.

Take a clean brush and apply the wash over tracks that are ready to be mounted on the vehicle, but only in the center section of the tracks. To achieve the look of drying mud and sand.

When using the product on spare tracks you can cover the whole tracks to give them a rusty appearance.

When the wash is dry you can use rusty pigments to finish off the effects.

Tracks are an important part of the vehicle. So use the right products to obtain a realistic finish, both on active as on spare tracks.
