

AK 4113
DARK RUST DEPOSIT

The ideal product to create special rust effects on your models. This is due to the especially designed enamel paint which, when dry has a light surface texture. Perfect to obtain that crusted rust effect.

Use this product to achieve a crusted rust effect on your model.

Shake very well before use, and apply straight from the jar in the desired areas and let it dry for 10-15 minutes.

Take a brush moist with thinner and blend in the paint until satisfied with the result.

Due to the very fine texture of the paint, you can achieve a realistic crusted rust effect. We recommend you work in layers for the best results.

Prepare your model or accessory with a base coat.

Apply the paint generously on your model, preferably in several layers.

Push the paint in place with a moist brush in a dabbing manner.

When completely dry the effects become clear. You will notice a light texture. Ideal for crusted rust effects in scale.

Where and how much you add these effects depends on what type of model you are painting and your taste. The possibilities are Unlimited.
