#### AK 8002 WATER GEL TRANSPARENT 250ML

#### AK 8003 WATER GEL ATLANTIC BLUE 250ML

#### AK 8004 WATER GEL PACIFIC BLUE 250ML

#### AK 8006 WATER GEL SWAMP GREEN 250ML

Acrylic product for textures in dioramas. Gel to replicate transparent waters. Specially developed to mimic moving, shallow water. Drying time is dependent on the amount used; however, 24 hours is what we recommend. This is a high quality acrylic product developed for extreme realism. You have different tones. Perfect results in layers from 0.1 to 3 mm. Is indicated for water in 1:700 or in 1:350. It can be diluted with water or an acrylic thinner to improve its flow.

#### AK 8007 WATER GEL EFFECTS 100 ML

The perfect product for recreating any type of moving water effects from the bow wake of any vessel, to waves, ripples, and waterfalls. Creating any moving effect is easy with this clear 1-part

#### AK 8036 WATER FOAM 100ML

The perfect product for recreating white foam in water effects from the bow wake of any vessel, to waves, ripples and waterfalls.. Use a spatula or an old brush for handling

#### AK 8008 STILL WATER 250ML

Still Water is a liquid crystalline product specially designed to reproduce the effect of clear still water on dioramas and vignettes. Still Water is self leveling and capable of flowing over uneven surfaces; apply thin layers, no more than 3 mm at a time. If depth is desired, build up thin layers. When applied on non-porous surfaces, such as glass, this product can be lifted and cut to desired shape. High quality acrylic product for all scales. This product can be tinted with acrylics offering many possibilities.

#### AK 8011 TERRAINS SNOW 250 ML

The perfect product to create a snow texture on any surface – terrain, vehicle or building. This is a high quality acrylic product developed for extreme realism.

Acrylic product for textures in dioramas. Perfect results in thin or thick layers. It can be diluted with water or an acrylic thinner to improve its flow.

#### AK 8010 SNOW MICROBALLOONS 100ML

Powder snow texture to for use over terrain or vehicle surfaces to achieve thawing snow or the first phases of a snowfall. It can be fixed with white glue, with varnish or with gravel & sand and in combination with wet effects to achieve perfect results. It can also be mixed with AK Puddles to get different kinds of dirty snow.

#### AK 8009 SNOW SPRINKLES 100ML

Spring snow texture used to achieve ultra realistic thin layers of snow. Snow sprinkles is a versatile product that can be used on its own; it also combines perfectly with AK8011 Snow Terrains. This is a high quality acrylic product developed for extreme realism. The drying time takes from 2-4 hours depending on the amount applied and temperature. Acrylic product to achieve snow texture. Perfect result in thin layers. It can be diluted with water or an acrylic thinner to improve its flow.

#### AK 8037 ICE SPARKLES 100ML

Product to use in vehicles, accessories or dioramas to create snow effects . you can achieve snow in the last fases of snowfalland thaw and can be combined with varnishes or for example wet effects or puddles for dirty snow. It a lso possible to get broken glasses.

#### TERRAINS EFFECTS

Terrains Effects is the higher range of products for dioramas in the market. All are acrylic product for textures in dioramas. Perfect results in thin or thick layers. It can be diluted with water or an acrylic thinner to improve its flow. You can work with pigments once dry to achieve tonal variation. Are ready to use with the correct texture and are easy to use. Yu acan see ideas of finishes in our you tube channel.
