

# TIPS AND TRICKS

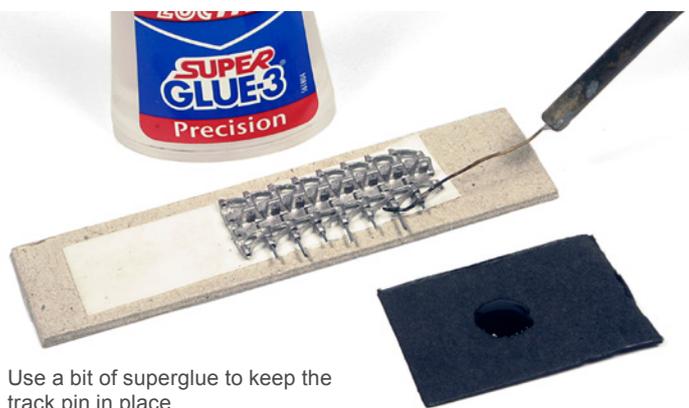

## ASSEMBLING FRIUL TRACKS

Align the tracks on a piece of double sided tape.

Cut the track pins slightly longer than needed.

Use a bit of superglue to keep the track pin in place.

Cut the pins to length and sand the edges smooth.

Friul tracks are one of the most realistic tracks on the market. The assembly will take some time, but it's really worth the effort.

Another option is to cut the pins directly to the right length and insert them in the tracks.

Fix them in place with a small drop of superglue.
